

Product summary:

Block of passive quadruple satellite taps, higher tap losses

Brief description:

4in/4out+4tap cascadable tap for distribution terrestrial and satellite signals from 1 satellite position (4 polarities). Passive design of taps brings about higher tap loss in comparison to active version T4/4+4PCN-3. Recommended as extension module for distribution of signals from next LNB.

Technical data:

Parameter	Condition	Value
Frequency range		950-2300 MHz
Tap loss		11 dB avg
Trunk loss		2 dB avg
Isolation between trunks		30 dB min
Dimensions (w,d,h)		12.7 x 10.4 x 4.1 cm
Temperature range		-30 ~ +70 °C
Weight		0.240 kg
