

Product summary:

Block of quadruple passive satellite splitters, higher insertion losses

Brief description:

4in/8out passive splitter for distribution satellite signals from 1 satellite position (4 polarities).

DC is passed from straight satellite outputs to the respective inputs.

Recommended as extension module for distribution of signals from next LNB.

Technical data:

Parameter	Condition	Value
Frequency range		950-2300 MHz
Insertion loss		5 dB avg
Isolation	Between splitters	35 dB min
	Between outputs of the splitter	13 dB min
Dimensions (w,d,h)		12.7 x 10.4 x 4.1 cm
Temperature range		-30 ~ +70 °C
Weight		0.300 kg
