

**Product summary:**

Block of quadruple passive satellite & single terrestrial splitters, higher insertion losses

**Brief description:**

5in/10out passive splitter for distribution terrestrial and satellite signals from 1 satellite position (4 polarities). DC is passed from straight satellite outputs to the respective inputs. The terrestrial section is DC blocked.

**Technical data:**

Parameter	Condition	Value
Frequency range	Sat. inputs	950-2300 MHz
	Terr. input	5-862 MHz,
	Sat. outputs	950-2300 MHz,
	Terr. outputs	5-862 MHz
Insertion loss	Sat.	5 dB avg
	Terr.	4 dB avg
Isolation	Between splitters	35 dB min
	Between outputs of sat. splitter	13 dB min
	Between outputs of terr. splitter	7 dB min
Dimensions (w,d,h)		12.7 x 10.4 x 4.1 cm
Temperature range		-30 ~ +70 °C
Weight		0.300 kg
